N° 1 FLOCKING UNIT
MODEL FLOCK 35x45

Flocking hopper manufactured in plexiglas, composed by a brush equipped with interchangeable staves for the correct flock distribution.

Useful flocking area: cm 35x45

The flocking unit is insulated from the unit by insulating material.

The brush acts on a stainless steel frame for the flock screen.

The unit is endowed with 3 different frames having a different openings for different kinds of flock.

The brush movement is controlled by a pneumatic piston.

The hopper is closed by transparent plexiglas.

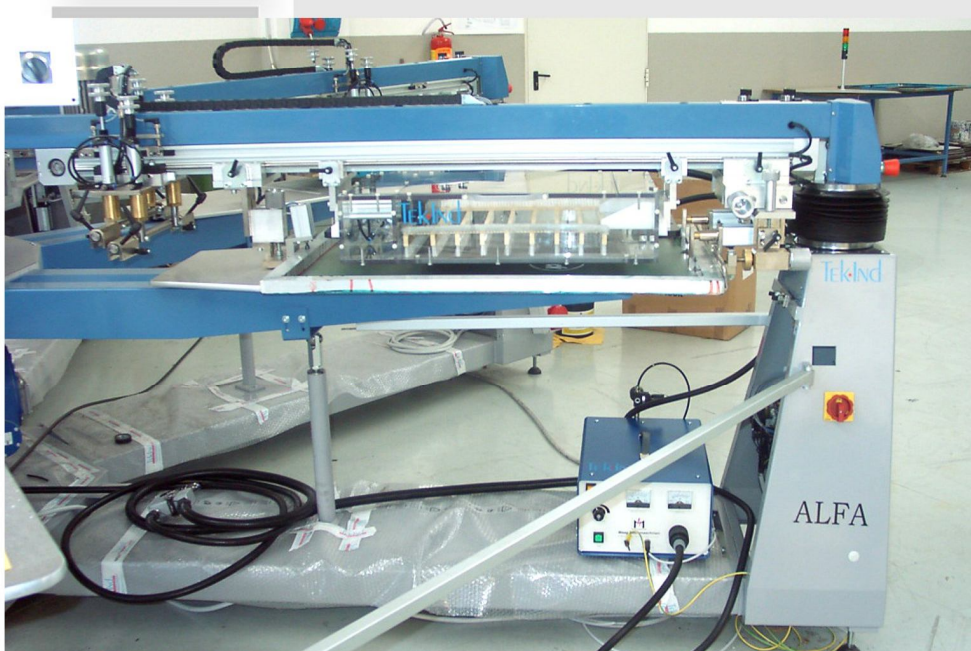

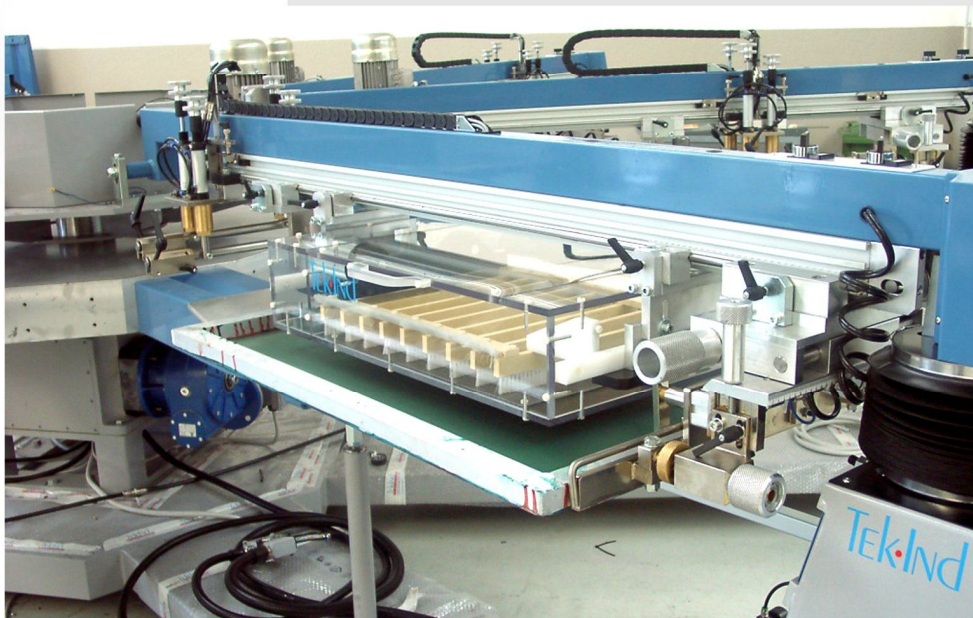

The unit is held by a carrying structure on wheels which can be installed on any screen printing machine.

The unit is also endowed with the electrical cabinet and control board.

The unit can be arranged to flock on a screen frame (optional)
